Profile

David is a registered patent attorney that has prepared and prosecuted numerous patent applications for electromechanical, biomedical and mechanical inventions, such as optical imaging/RFID enabled medical devices, genetic assays for brain diseases, pulmonary diagnostic devices, auditory detection systems, microRNA amplification processes and NMR detectors.

He frequently counsels inventors on patent matters and assists companies with implementing value driven intellectual property strategies.

In addition to the preparation and prosecution of patent, trademark and copyright applications in the U.S. and overseas, David handles the enforcement of the full range of intellectual property rights, including the litigation of patent, trademark and copyright matters. He has litigated infringement disputes, conducted patent claim construction hearings and served as trial counsel in federal district courts and the International Trade Commission on matters involving nationally known consumer electronic goods, medical devices, computer software systems, electrical wiring receptacles and rollercoasters, among others.
