

Health Care

Overview

Healthcare Lawyers

Health care is among the most heavily regulated industries in the nation, subject to a complex and constantly evolving network of federal and state laws, regulations and mandates.

At Bond, we have a statewide practice with the leverage, integration and depth needed to navigate this ever-changing field.

As our client, our attorneys will guide and assist you in identifying and implementing strategies to achieve your business goals while managing the demands of regulatory oversight and compliance. This includes industry-specific advice in the areas of business transactions, corporate compliance, reimbursement, structuring of practice groups, network development, provider compensation, and comprehensive coverage on core health law matters.

To further serve you, we provide teams of integrated cross-practice attorneys who are accomplished in the fields of labor and employment, employee benefits, corporate and antitrust law, financial restructuring and complex litigation. Your business needs are well served with integrated practice teams which know the unique mandates of the health care industry. Our culture also includes efficient delivery of legal services with a long standing information technology/E-discovery support group centrally available to all of our clients.

Bond's health attorneys include a core group across the state with decades of health care experience derived from serving as in-house counsel to hospitals, health systems, governmental regulators and senior policy makers. Our attorneys have also served in high level positions at health care systems, state agencies and trade associations. We have assisted and defended clients in federal and state health care reform since the early 1980s, including new care delivery models, value based purchasing, transition to Medicaid/Medicare managed care, corporate restructuring, and the Delivery System Reform Incentive Payment (DSRIP) program.

For further information, please take a tour of our on-line publications where we routinely advise on the latest developments in the field (Bond's Health Law Wire), the various mandates posted on the web (WebRulation) as well as in-depth industry guidance (Bond Informational Memos). Additionally, our attorneys provide a wealth of timely updates at various conferences, client webcasts and training events.
