

Mergers and Acquisitions

Overview

Bond customizes a transaction team for every transaction (whether it be a merger, acquisition, sale of a business, equity raise, joint venture, cross purchase, break-up of a business or special financing).

Every transaction team is assembled with the goal of bringing together the right professionals to achieve each client's objectives in the most practical and efficient manner. We serve as long standing transaction counsel to variety of clients, both publicly traded companies and private sector businesses (including closely held businesses, individuals, family offices, venture and private equity funds, not-for-profit organizations, portfolio companies, cooperatives and other organizations).

We also serve as co-transaction counsel where our role is limited to assisting other professionals with specific parts of a transaction because of our knowledge, depth and experience. Alternatively, we serve as special transaction counsel for clients of other professionals for the limited purpose of undertaking the transaction.

Our transaction teams have experience in a wide variety of transactions, across many industries, states, countries and price points. These experiences allow us to provide practical approaches and solutions and specialized structuring to obtain the desired business objectives in the most practical and efficient manner. Depending on the transaction and our role, we can draw from a large pool of professionals with specific transaction experiences, including tax, securities, business, employee benefits, bankruptcy, intellectual property, environmental, real estate, labor and employment, and antitrust.

We like what we do, we like each other, and the clients and other professionals we work with like us. We help make transactions successful and enjoyable.
