

BOND

ENVIRONMENTAL AND ENERGY

Experienced. Connected. Resource-Rich.

Navigating the shifting, acronym-riddled landscape of environmental and energy law can be intimidating. Whether you're a municipality, a university, a manufacturer or a small business looking to buy or sell real estate, environmental concerns can loom large. Similarly, rapid changes in the energy industry and its regulatory climate compel clients to seek a strong legal partner—whether to assist in siting and permitting facilities for generating, transmitting, transporting and storing energy, or to defend against enforcement actions.

From our eight locations across New York State, Bond, Schoeneck & King is positioned to efficiently assess your needs and shepherd you through key processes. Where your project requires additional resources—experience in public finance, property valuation or environmental litigation, for example—we draw on other professionals at Bond to round out your team.

As Environmental and Energy Laws Have Evolved, So Has Bond

Even before the federal Superfund was created in 1980, Bond attorneys had begun carving a niche in environmental law. As regulations have burgeoned and energy law has grown more complex, Bond has been on the scene, understanding the new rules and equipping clients to manage ever-increasing demands.

Our relationships with representatives from the U.S. Environmental Protection Agency (EPA), the New York State Department of Environmental Conservation (DEC), the New York State Department of Public Service (DPS) and other agencies and local boards encourage prompt attention to our clients' needs.

Bond serves clients in agribusiness, commercial lending, health care, higher education, manufacturing, municipalities, school districts, pharmaceuticals, real estate development and construction, and small business. Energy clients include generation facilities, service providers, regulated public utilities and product and technology developers.

Why Choose Bond?

- **We're experienced.** As environmental and energy law have evolved, Bond has been proactive, staying abreast of new rules and anticipating clients' needs.
- **We're results-oriented.** We understand our clients' goals and how to work with regulators to achieve those goals, taking an assertive but respectful stance.
- **We're right-sized and responsive.** Bond is large enough to offer breadth and deep experience, but small enough to stay involved in smaller projects and routine matters.
- **We're proactive.** Clients who consult with us early in a project gain a better understanding of what's involved—potentially saving time, money and headaches.
- **We're well-connected.** Our insistence on cultivating relationships with municipalities, agencies, regulators and fellow members of the Bar means that when our clients need us to help get a deal done, we're poised to assist.
- **We're cost-sensitive.** Our experience and relationships allow us to work efficiently, respecting our clients' financial constraints.

Need a trusted ally to help handle complex regulatory demands? Look to Bond.

About Bond, Schoeneck & King

Bond, Schoeneck & King PLLC serves individuals, companies and public-sector entities in a broad range of areas.

With 275 lawyers and 15 offices, we represent clients in manufacturing; agribusiness; commercial lending and real estate and construction; energy; health care and long term care as well as municipalities, school districts, higher education and other exempt and nonprofit organizations. We maintain ten offices across New York; and one each in Boston; Kansas City; Naples; West Palm Beach and Red Bank, New Jersey.

Bond is committed to understanding our clients' needs and providing comprehensive, practical, high-quality and responsive solutions. We strive to maintain the highest professional and ethical standards, and to provide leadership in community activities, pro-bono work and service to the Bar.

- New York State Wetlands Forum (NYSWF)
- U.S. Green Building Council (USGBC) New York Upstate Chapter

Our Team

The Chambers USA guide ranks Bond's team—a core of a dozen lawyers—among the best for environmental law. Chambers specifically cites Kevin Bernstein's work on permitting matters, gas storage, power generation and mining issues; Barry Kogut's experience in brownfield development and regulatory compliance and enforcement; and Virginia Robbins' knowledge of water and air matters.

Bond attorneys have served as chairs of the Environmental Law Section of the New York State Bar Association.
